

## Functionality and quality for good furniture design

For over fifty years, MerzRoller has been manufacturing quality fittings. The results of that work have always been products, which combined quality and design.

## Usefulness for our customers as a goal - True partnership as a guarantee for a successful joint future.

As a supplier, we develop and produce a wide variety of fittings, which perform their duties most reliable and almost invisible.

## Products

MerzRoller is large enough for a rational and low-cost production of comprehensive product series, but not too big to be able to cater special requirements. In this aspect, MerzRoller regards itself as a supplier, capable manufacturing individual specialties.
